Balloon Works

The application for the replacement of water meters

Android Application

With a simple download of the application from Google Play, the user can install it and without any special knowledge, connect to it. By using special & personal passwords, he can work alone or in a team, even offline.

This user will benefit from the use of the application as they will be able to permanently:

- Has access to the list of meters assigned to any task
- See useful statistics about the work you have done or are about to do
- Search any meter by name, status or even its position on the map
- Record the work in detail by filling in 2 simple fields and photographing the work
- He sends the server the data of the work he has done, any time he wants and he has a stable internet connection.
